

Turbo Charge Your Family Law Practice

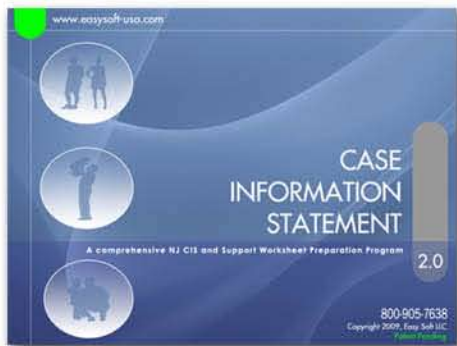

with the all new Case Information Statement (CIS 2.0)

No other software comes close to New Jersey's most popular family law program, packed with features that work like magic. Here are just a few highlights:

- **Edit & Email CIS:** Edit filled-in Case Information Statement, worksheets and other forms (20 in all) with a built-in editor, save as Word or PDF and email, all within the program. That typewriter can be rested.
- **CISlite for Initial Client Data Collection*:** CISlite is a Word form clients can fill-in and email to you. Import the completed form and all data is automatically placed in the appropriate places, nearly completing CIS without any typing.
- **Centralized Worksheet Alerts:** All worksheet alerts and exceptions are listed in one central place (e.g. PPR household income test failure or income exceeding tax/award tables.) Quickly review and make required changes instead of looking in many different places.
- **Manipulate Multiple Worksheets*:** Experiment with as many scenarios as you like, all within same client file. Create a worksheet, copy it, develop, manipulate and analyze another scenario! Compare as many as five worksheets in a case, side by side. Problem solved!
- **Switch Custodial Parent (PPR) Values with Non-Custodial Parent (PAR) Values*:** There's no need to create another file, and manually move countless values from one to another. Just click, to "Flip CP values with NCP values," and voila. Instant results!
- **Split-Parenting Case:** Now headache free. Simply copy the worksheet. Flip CP values with NCP and you have a complete split-parent case in less than a minute!
- **Assets/Liabilities List:** Apart from marking certain items "TBD" or "Unknown," in the new CIS software, you can also mark items as "Estimated." CIS prints values with an "est." notation, indicating an approximate value.
- **Data Exchange with Divorce Financials:** Seamless assets, liabilities and income data exchange with Divorce Financials. Divorce Financials is a complete divorce settlement system producing tax optimized alimony and child support payment scenarios. You can also automate assets and liabilities distribution.

*Optional add-on modules.

CIS 2.0 Offers More Features – More Solutions

PATENT PENDING

- Up-to-date New Jersey Guidelines
- Integrated Sole, Shared and ODD Worksheets
