CIS Software Offers More Features – More Solutions

Child Support Worksheets

- Automatic calculations for taxes, basic support, age adjustment, child care, health care, other dependants, overnights adjustments, sole vs. shared parenting and everything else.
- All worksheet alerts and exceptions are listed in one central place (e.g. income exceeding tax/award tables).
- Manipulate Multiple Worksheets*: Experiment and compare multiple support scenarios, all within the same client file. Flip PPR values with PAR and instantly generate split parenting worksheets.

Case Information Statement

- Numerous tools for efficient data processing such as averaging last three paychecks, allocating taxes from a joint tax return, debt service calculations, etc.
- Enter Historical Expenditures for Husband, Wife and Children separately and generate a Lifestyle Expenditure document.
- Assets/Liabilities List: Enter unlimited number of items. Mark any value as TBD, Unknown or Estimated.
- Enter equitable and proposed distribution data and generate an Assets & Liabilities Distribution report separately.
- CIS Endnotes: Endnotes make it extremely easy to add illustrations to important values.

FamilyDocs Module

- Enter data once and assemble any document. Entire library of New Jersey Family Law Forms published by NJICLE (over 120 forms) is included.
- Add your own forms or customize provided forms. Your entire workgroup can use one set of standardized forms.
- Save all prepared documents within the same CIS file. You can also save any form as a Word or PDF and email.

*CISlite, Worksheet Magic and FamilyDocs are optional add-on modules.
