## With Divorce Financials, family law firms can:

- Convert prospects to clients at the very first meeting by showing settlement options and after-tax impact.
- Analyze in-depth impact of up to five alimony and child support payment scenarios.
- Simultaneously view net disposable income of both parties for each scenario.
- Assemble distributable assets and liabilities and propose various scenarios demonstrating distribution effects. *Always know the cash adjustment needed to "make the pot right!"*
- Compute present value of a future pension stream or an alimony stream.
- Easily produce customized, professional reports and charts, suitable for clients, opposing counsel and the judge.
- Reach quick settlements by presenting after-tax impact of spousal and child support scenarios plus distribution effects.

*"Easy Soft's family law products help us work with our clients, opposing counsel, in MESP sessions, and at court hearings to reach that desired equilibrium in divorce settlements."*
