

New York Uncontested Divorce 2.0

Easy Soft's NYUD 2.0 comes with over 20 Documents and Papers

V2.0 Includes New Required Form "Certificate of Dissolution of Marriage"

Introducing NYUD 2.0 for Windows

In NY, filing for Uncontested Divorce usually requires over a dozen forms. NYUD will save time and improve your office efficiency by reducing preparation time. Information common to most UD Forms may be entered directly into a tabbed Client Window. This information is copied automatically to the UD Form, creating a NYUD Form file containing protected text that may be stored on disk for later retrieval and/or printed in full on blank paper. The assembled document may also be saved in several other popular formats containing totally accessible text that may be opened by many different editors or word processors.

In addition to typical Windows Installation, Menu Bar, Toolbar, Help and Printer functions, our new program contains the following features:

- **Automatic Document Printing:** All necessary information previously entered in the Client File is placed in the document automatically, via a built-in Word Processor. This feature alone will save enough of your staff's time to cover the cost of the program with the first use
- **Client file information** (caption, plaintiff, defendant, children, child support, etc.) may be entered directly into a self-explanatory tabbed window.
- **Child Support Worksheet (UD-8):** All required calculations are done automatically and transferred to the form.
- **Windows HELP File:** Contains complete hyper-linked New York Uncontested Divorce Instructions including instructions for starting the action, instructions for filing the action with the court and placing the case on the court's calendar.
- **Choice of formats for saving finished document:** Completed document may be printed immediately for a "boilerplate" effect or saved as a NYUD Document containing protected text or as Word, RTF or Text, containing totally accessible text that may be opened by many different editors or word processors.
- **Add New Forms:** Additional new forms may be created from existing word processing documents or by altering the included documents using the built-in Word Processor. User may choose the

folder (STEP1, STEP8, etc.) for including new documents or create new folders.

Included Forms:

- ★ Summons With Notice
- ★ Summons to be served with Verified Complaint
- ★ Verified Complaint
- ★ Affidavit of Service
- ★ Sworn Statement of Removal of Barriers to Remarriage
- ★ Affidavit of Service
- ★ Affirmation (Affidavit) of Regularity

- ★ Notice of Entry
- ★ Certificate of Dissolution of Marriage
- ★ Self-addressed and Stamped Postcard
- ★ UCS-111 (UCS Child Support Summary)
- ★ New York State Case Registry Filing Form (updated 12/2004)

How Does it Work?

Information common to most UD Forms is entered directly into a self-explanatory tabbed window (caption, plaintiff, defendant, children, child support, etc.). To access an existing file, choose Open from the File Menu. To create a new document, double click Templates in the Sidebar, open the desired folder (e.g. STEP8) by clicking the plus sign to the left of its name, double click the desired template name or click with right mouse button and select "Merge".
